

# MCC Sizing Guidelines For Submitting Digital Images

The following sizing guidelines apply to all digital image submissions for MCC competitions, including Nature, Pictorial, Print (digital submissions only) and Gemboree.

**Digital images should be submitted with a maximum width of 3840 pixels and a maximum height of 2160 pixels.** Given the larger file size, you may have to submit your images in separate emails in order to not exceed 10 Mb per email

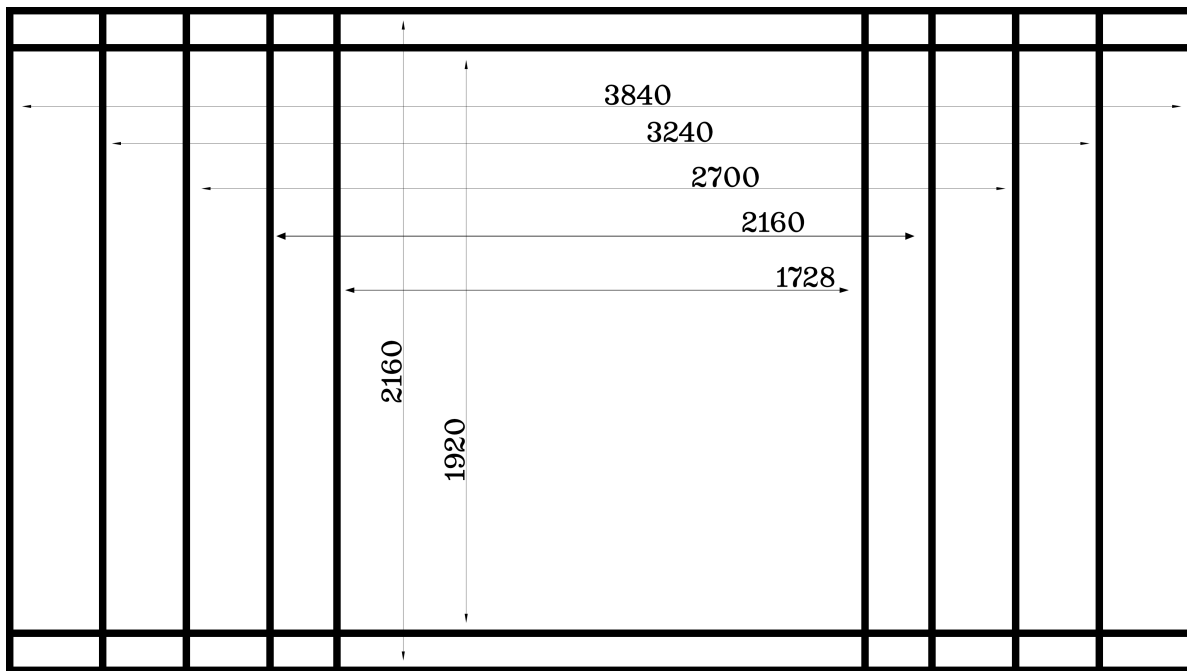

If you set either your image width to 3840 or your image height to 2160 AND make sure that both width and height do not exceed the maximums, then your image will be sized correctly for submitting to an MCC competition and will use as much of the projector's 3840 x 2160 pixel screen as possible.

Some examples of image sizing are: (other ratios are acceptable)

aspect ratio	orientation	width	height	comment
16:9	landscape	3840	2160	uses the full screen
3:2	landscape	3240	2160	most common aspect ratio from cameras
2:1	landscape	3840	1920	example of panoramic aspect ratio
4:5	landscape	2700	2160	common ratio for 8x10 or 16x 20 print
5:4	portrait	1728	2160	common ratio for 8x10 or 16x 20 print
1:1	square	2160	2160	square format

\* most images in the portrait or landscape orientation, other than panoramas, will use the full screen height of 2160 pixels.

\* note that not all landscape images use the full screen width of 3840 pixels.

For further assistance with image sizing, please contact Paul Eifert ([mccpublicity1@gmail.com](mailto:mccpublicity1@gmail.com)) or Cindy Canavan ([mccmemberships@gmail.com](mailto:mccmemberships@gmail.com))
